# FACADE BOARD:

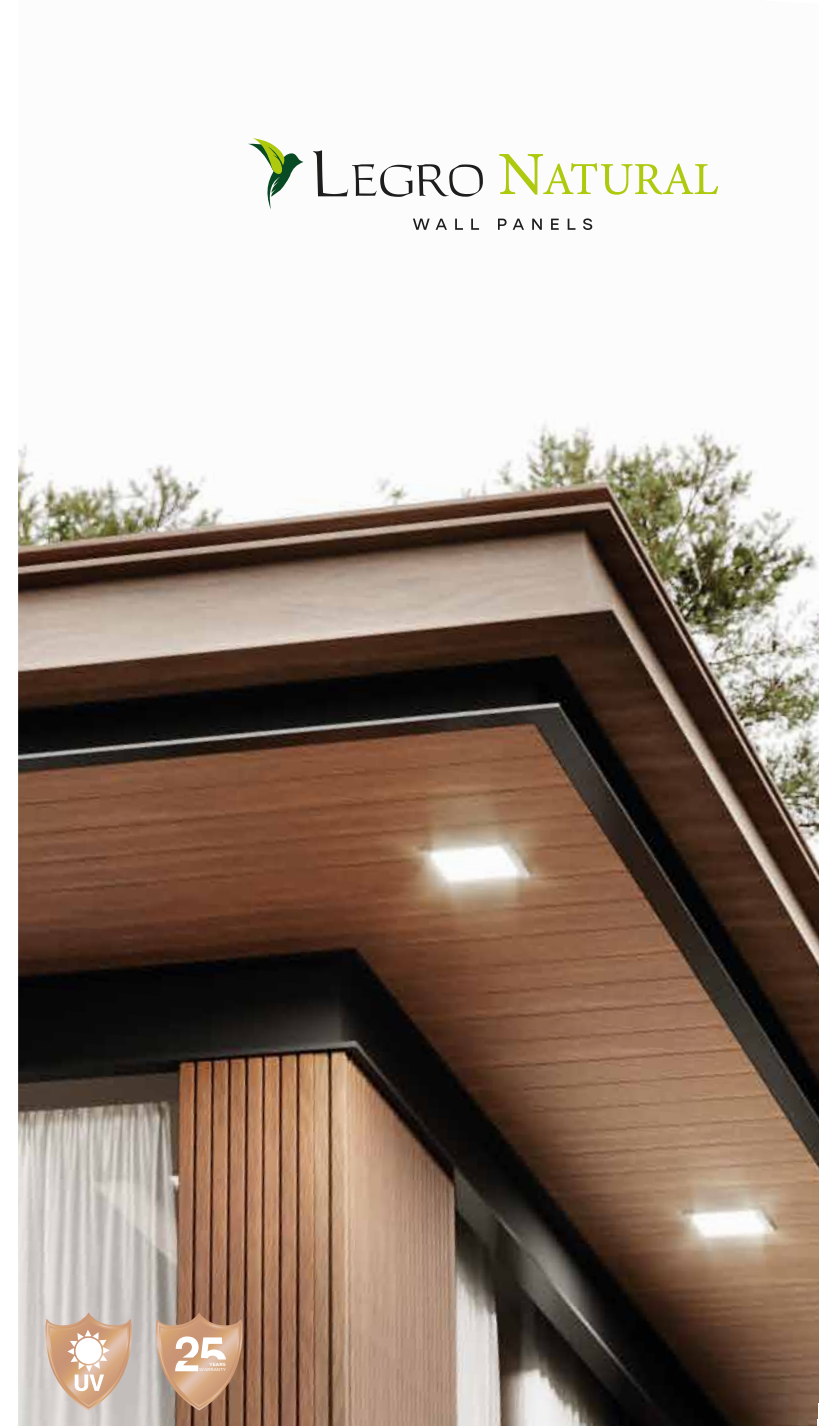

## Natural Beauty and Innovative Quality

Legro is proud to introduce Legro Natural Wall Panels, an innovative interior and exterior wall paneling and soffit-filling material.

Utilizing a consistent technology in all Legro products, Legro Natural Wall Panels are constructed with a strong core encased in a protective layer on all four sides.

This protective layer ensures unique stability and guarantees durability for at least twenty-five years. Moreover, these panels exhibit exceptional resistance to stains, sunlight, and the elements while demanding minimal maintenance.

Legro Natural Wall Panels are a quality wall decoration and a design element capable of transforming any space into an exquisite and distinctive interior or exterior.

## UNIQUE TEXTURE

Our manufacturing process allows us to replicate randomly varying shades, rendering each lamella a truly one-of-a-kind piece.

The diversity of shades allows projects to match the surroundings, complimenting your style and design.

## ANTI-STAIN AND ANTI-FADING GUARANTEE.

We have lots of experience serving our clients in different climate conditions and are happy to guarantee no visible changes in our product color for at least 25 years.

We are confident in our product and ensure the longevity of your investment.

## UNIQUE TECHNOLOGY

NATURAL COLOR  
multi-tone coloring of each board

NATURAL TEXTURE  
surface brushing technology

INCREASED WEAR  
RESISTANCE  
increased wall thickness

Co-extrusion technology protects the composite material with the additional layer. The unique formula of the polymer layer for surface protection guarantees that the panels won't turn darker with time. Also, it significantly reduces the need for maintenance.

100% STAIN PROTECTION  
unique protective layer

## AESTHETICS

A unique look that combines soft-touch material, rich colors, and a variety of multi-tone tones similar to natural woods.

## MINIMAL MAINTENANCE

Unlike natural wood, Legro facades do not need annual oil or paint treatment. The protective layer provides durability and preservation of the original appearance without additional treatment.

## HIGH RESISTANCE AND DURABILITY

It is highly resistant to fading and guarantees 100% protection against termites, extending the product's lifetime. The facade does not absorb moisture, retaining its original appearance in all weather conditions.

## ECO-FRIENDLY

The high-tech wood-polymer compound consists of 60% wood chips, 30% polyethylene, and 10% various additives. It is safe for health, has no toxic substances, and is produced without glue and heavy metals. For 95%, it consists of recycled materials.

LEGRO FS 21

LEGRO FS 15

# FS 15 FACADE PANELS LEGRO NATURAL

Legro Natural FS 15 are the epitome of contemporary elegance, the ideal solution for modern architecture. Their exquisite design imitates natural wooden lamellas, adding airiness and sophistication to the external facade. They serve as a perfect solution for cladding buildings and filling soffits, emphasizing the uniqueness and sophistication of each project.

# ADVANCED MOUNTING SYSTEM

## EASY INSTALLATION

Installation becomes much simpler and more convenient because all the necessary elements are included in the kit. This reduces installation time and costs and eliminates the need to purchase individual components.

## AESTHETICS

The installation system has been developed considering the wishes and needs of designers and architects to give the building facade a finished, modern, attractive look. The components of the system are easily combined, helping to create straight lines and precise angles.

## GAP TEMPERATURE COMPENSATION

A special clip in the mounting system has compensatory thermal gaps. This allows the facade to expand or contract in response to temperature changes without creating unwanted tension.

## RELIABILITY

The mounting system provides secure fastening of the façade elements, guaranteeing their reliability and stability even under adverse conditions. This is especially important in adverse weather conditions or high wind loads.
